

ActiveDocs Opus Suite System Requirements

Document Excellence through Innovation

ActiveDocs Opus Composition Server 32-bit Edition

ActiveDocs Opus Composition Server can coexist with many other server applications. ActiveDocs recommends testing coexistent server applications.

Software

Platforms (any of):

- Microsoft Windows Server 2003
 - Requires SP2 or later
 - Server 2003 32-bit and 64-bit editions supported when IIS is enabled for 32-bit applications
- Microsoft Windows Server 2008 (including R2)
 - Requires SP1 or later
 - Server 2008 32-bit and 64-bit editions supported when IIS is enabled for 32-bit applications
- Microsoft Windows Vista 32-bit
 - For product testing or evaluation only
- Microsoft Windows 7 32-bit
 - For product testing or evaluation only

Application Servers (all of):

- Microsoft Internet Information Server (IIS)
- Microsoft SQL Server 2005 or Microsoft SQL Server 2008

Other Software (all of):

- Microsoft .NET Framework 3.5
- Microsoft Management Console 3.0 (MMC3)

Optional Software:

- Microsoft Office 2007 (SP2 or higher) or Microsoft Office 2010
 - Required if server-based printing is needed
 - Required if any conversion from Word 2007 to other document formats is needed
- Neevia docCreator V3.x
 - Alternative to using Microsoft Office Word for PDF conversion
 - Required if TIFF output and/or server-based fax delivery is needed
 - Requires Microsoft Office Word 2007 (see above)
- Microsoft Report Viewer 2008
 - Required for the use of ActiveDocs Opus Composition Server Reports

Hardware

In addition to the minimum hardware requirements for Microsoft Word and the operating system, consider the following:

- Number of users
- System load (peak and troughs)
- Complexity of documents
- Types of tasks e.g., batch document assembly, printing, file format transformation, content storage
- Disaster recovery planning
- Required system availability
- Other applications or services running on the Server

ActiveDocs Opus Suite System Requirements

Document Excellence through Innovation

ActiveDocs Opus Composition Server 64-bit Edition

ActiveDocs Opus Composition Server can coexist with many other server applications. ActiveDocs recommends testing coexistent server applications.

Software

Platforms (any of):

- Microsoft Windows Server 2003 64-bit
 - Requires SP2 or later
 - Server 2003 32-bit edition is **not** supported
- Microsoft Windows Server 2008 64-bit (or R2)
 - Requires SP1 or later
 - Server 2008 32-bit edition is **not** supported
- Windows 7 64-bit
 - For product testing or evaluation only

Application Servers (all of):

- Microsoft Internet Information Server (IIS)
- Microsoft SQL Server 2005 or Microsoft SQL Server 2008

Other Software (all of):

- Microsoft .NET Framework 3.5
- Microsoft Management Console 3.0 (MMC3)

Optional Software:

- Microsoft Office 2007 (SP2 or higher) or Microsoft Office 2010
 - Required if server-based printing is needed
 - Required if any conversion from Word 2007 to other document formats is needed
- Neevia docCreator V3.x
 - Alternative to using Microsoft Office Word for PDF conversion
 - Required if TIFF output and/or server-based fax delivery is needed
 - Requires Microsoft Office Word 2007 (see above)
- Microsoft Report Viewer 2008
 - Required for the use of ActiveDocs Opus Composition Server Reports

Hardware

In addition to the minimum hardware requirements for Microsoft Word and the operating system, consider the following:

- Number of users
- System load (peak and troughs)
- Complexity of documents
- Types of tasks e.g., batch document assembly, printing, file format transformation, content storage
- Disaster recovery planning
- Required system availability
- Other applications or services running on the Server

ActiveDocs Opus Suite System Requirements

Document Excellence through Innovation

ActiveDocs Opus Designer / ActiveDocs Opus Client

Software

Platforms (any of):

- Microsoft Windows 7
- Microsoft Windows Vista
 - SP1 required
- Microsoft Windows XP
 - SP2 required

Other Software (all of):

- Microsoft .NET Framework 3.5
- Microsoft Office 2007 (SP2 or higher) or Microsoft Office 2010
 - Requires full installation of Microsoft Office Word Standard or higher
 - Microsoft .NET Programmability Support must be enabled for 'Office Tools', 'Microsoft Graph', 'Microsoft Office Word', and any other Microsoft Office products from which the ActiveDocs Opus Research Service will be used. These features can be enabled through the Windows Control Panel by selecting 'Add or Remove Features' for Microsoft Office.
- Microsoft Internet Explorer 6.0 or later

Data Connectivity

- ODBC / OLEDB
- Microsoft SQL Server
- Active Directory

Hardware

- Minimum RAM 512 MB
 - Recommended: 2 GB or higher
 - A minimum of 1 GB of RAM must be allocated to the virtual machine when running ActiveDocs Designer or Client in a virtualised environment
- Minimum Free Disk Space 1 GB
- Minimum processor Pentium 4 Compatible or higher with 1.6 GHz Single Core
 - 2.0 GHz Dual Core recommended
 - 2.0 GHz Dual Core minimum when running ActiveDocs Designer or Client in a virtualised environment.
